

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1-4. (cancelled)

5. (currently amended) A high-frequency power inductance element
~~according to claim 1 or 2, comprising:~~

a coil formed of a band-shaped conductor spirally wound in a cylindrical shape so
that the wider surfaces thereof come flush with each other;

an electrically insulated bobbin for mounting said coil thereon; and

a core inserted into said bobbin to form a closed magnetic circuit;

wherein the middle portion of the band-shaped conductor forming said coil is
formed as a middle tap-out terminal of said coil.

6-12. (cancelled)

13. (new) A high-frequency power inductance element according to claim 5,
wherein said coil is formed of the band-shaped conductor wound spirally in a cylindrical
shape such that said band-shaped conductor being formed into rectangular staggered
patterns which extend in the same direction as a whole while bending in an L-shape to

the left and right, is folded in the vertical and horizontal direction alternately relative to the pattern plane.
